Through our 15 years experience we got the knowledge to form **exclusive materials**, investing time and energies in order to gain the perfection of our products.

The basic material to produce our luxury and flexible products are mineral materials or Solid Surface materials, especially the well known **Corian®** of DuPont®. This is how products combining elegance and versatility come to life.

PLANIT sees himself as a industrial manufacture unifying the advantages of professional craftsmanship with technical efficiency and innovation spirit.

Cause of our highly flexible production processes we are able to create **tailore-made products in very small lot sizes** as well as **larger batches** on our modern production machines.

PLANIT follows a clear **growth strategy one of the leading companies** in the Solid Surface production sector in Italy.

Management: Manfred Abrame Johann Simonini

PLANIT was established in 1995 and it immediately became a first class company through its production and marketing of objects made of Corian® and not only.

Planit avails itself of a young and dynamic **team of 20 excellent professionals** who work in an interactive way on the products.

Through constant training and refresher initiatives, Planit perfects its technique and material processing and favours the development of **new technologies**.

Solutions in solid surface

The contract sector is, with over 30% of the overall annual sales, one of the most important sectors of the firm. The product portfolio for public spaces includes furniture for **hotel**, **bar** and **shops** as well as **public buildings** and **hospitals**.

Moreover, in the last years, PLANIT has become one of the leading companies in the sector of **bathroom furniture**, with own collections of washbasins, showers and bathtubs of the highest quality. In addition to this, the **working plans for kitchens** realized for carpentries and furniture factories.

The solid surfaces are composite materials, made by natural minerals (2/3) and acrylic resin (1/3). The most established product of these category is the so called **Corian®**, patented by **DuPont®**. PLANIT uses **Hanex®** by **Hanwha** as alternative material for furniture of public spaces.

Advantages of mineral composite

- Beauty, functionality, modernity
- Invisible junctions
- Maximal flexibility of the shapes (3D)
- Wide color scale (more than 100 colors)
- Thermoformability
- Workability (as wood)
- Ease of clean
- High hygiene (non porous material)
- Longevity and durability
- Ten year warranty (Corian®)
- Easily restorable in case of damages

CORIAN®
SOLID SURFACES

Hanex®
Solid Surfaces
by Hanwha Surfaces

PLANIT uses only advanced machineries and instrumentations.

The milling and cut processes are managed by **multiaxes CNC machineries**

The high flexibility of the shapes is reached through a manual or mechanical thermofforming process.

The standard samples can be transformed through specific **moulds** for a mass production. This allows to sink the costs of large quantity productions.

Our workers are highly specialized in **assembling and pasting** of the different components through a special stick. This special technique allows to form exclusive products without any visible junctions.

After being polished the product follows a **strict quality control process**, last and highly important phase of the production process

In order to avoid storage and transportation damages we use **resistant and strong packaging**. The packaging and shipping procedures are defined with the customer, in order to optimize the logistic process.

Customer service

Unlike other producers, we offer a professional **repair-service** of all the goods in solid surface, combined with a **ten year warranty**

QUALITY NETWORK

DuPont™
CORIAN™
SOLID SURFACES

As highly specialized firm of composite mineral materials and Corian® we offer an **information and consultancy service**. Our salesmen follow specific **training courses** in order to acquire high competences of solid surfaces, their manufacturing techniques, possible application and diverse advantages.

Furthermore we offer our customers a constant and active **support** in the **planning** and **presentation of offers** for contract works or similar that foresee composite mineral products and materials

With 25 salesmen and many external collaborators, PLANIT is the only Italian producer of solid surface having a nationwide **established commercial network**.

In the industrial and health sector we supply with our products businesses like GIVAS, MOLTENI and EUROSTAND.

Locally (Trentino-Alto Adige) the firm works with carpentries and furniture factories in the sector of working plans in solid surface. In the Contract sector PLANIT cooperates from many years with many businesses realizing furniture for public spaces and is leader in the sector of solid surfaces for hotels, bars, shops, museums, hospitals and nursing homes.

PLANIT has cooperated **nationwide** with many architects in different well-known projects (mostly in the hotel sector), establishing its position nationwide.

Moreover the amount of contracting relying on solid surface product, for their durability, is increasing every year.

Finally PLANIT is established in **international markets** like Austria, France, Germany, UK, Israel and Switzerland as well.

PLANIT proposes himself as partner for the furniture of public spaces. The **advantages** of the collaboration with our business are different

- High-quality innovative and exclusive products
- Use of solid surfaces (Corian®), high-performance and innovative materials
- Modern design oriented products
- Special solutions according to the existing building situations. (Market studies show a constant increase in restructuring and requalification works of existing buildings)
- Experience with big firms and professional management of the logistic process (delivery to warehouses or final customer)
- Exhaustive commercial documentation with product catalogues
- Assistance and support by high qualified staff during the entire assembling phase
- Consultancy and problem solving services
- Ten year warranties for materials

Different sectors show different needs on quality and price.

If the price is essential, a:

- proper choice of the materials,
- of the colors,
- a proper choice of the quality of the polishing processes,
- and a specific configuration of the shapes

Allows to... Realize specific and special project at contained costs.

Moreover in case of specific quantities we can rationalize the production, reducing therefore the overall costs.

Our strengths: quick deliveries and efficient logistic process!

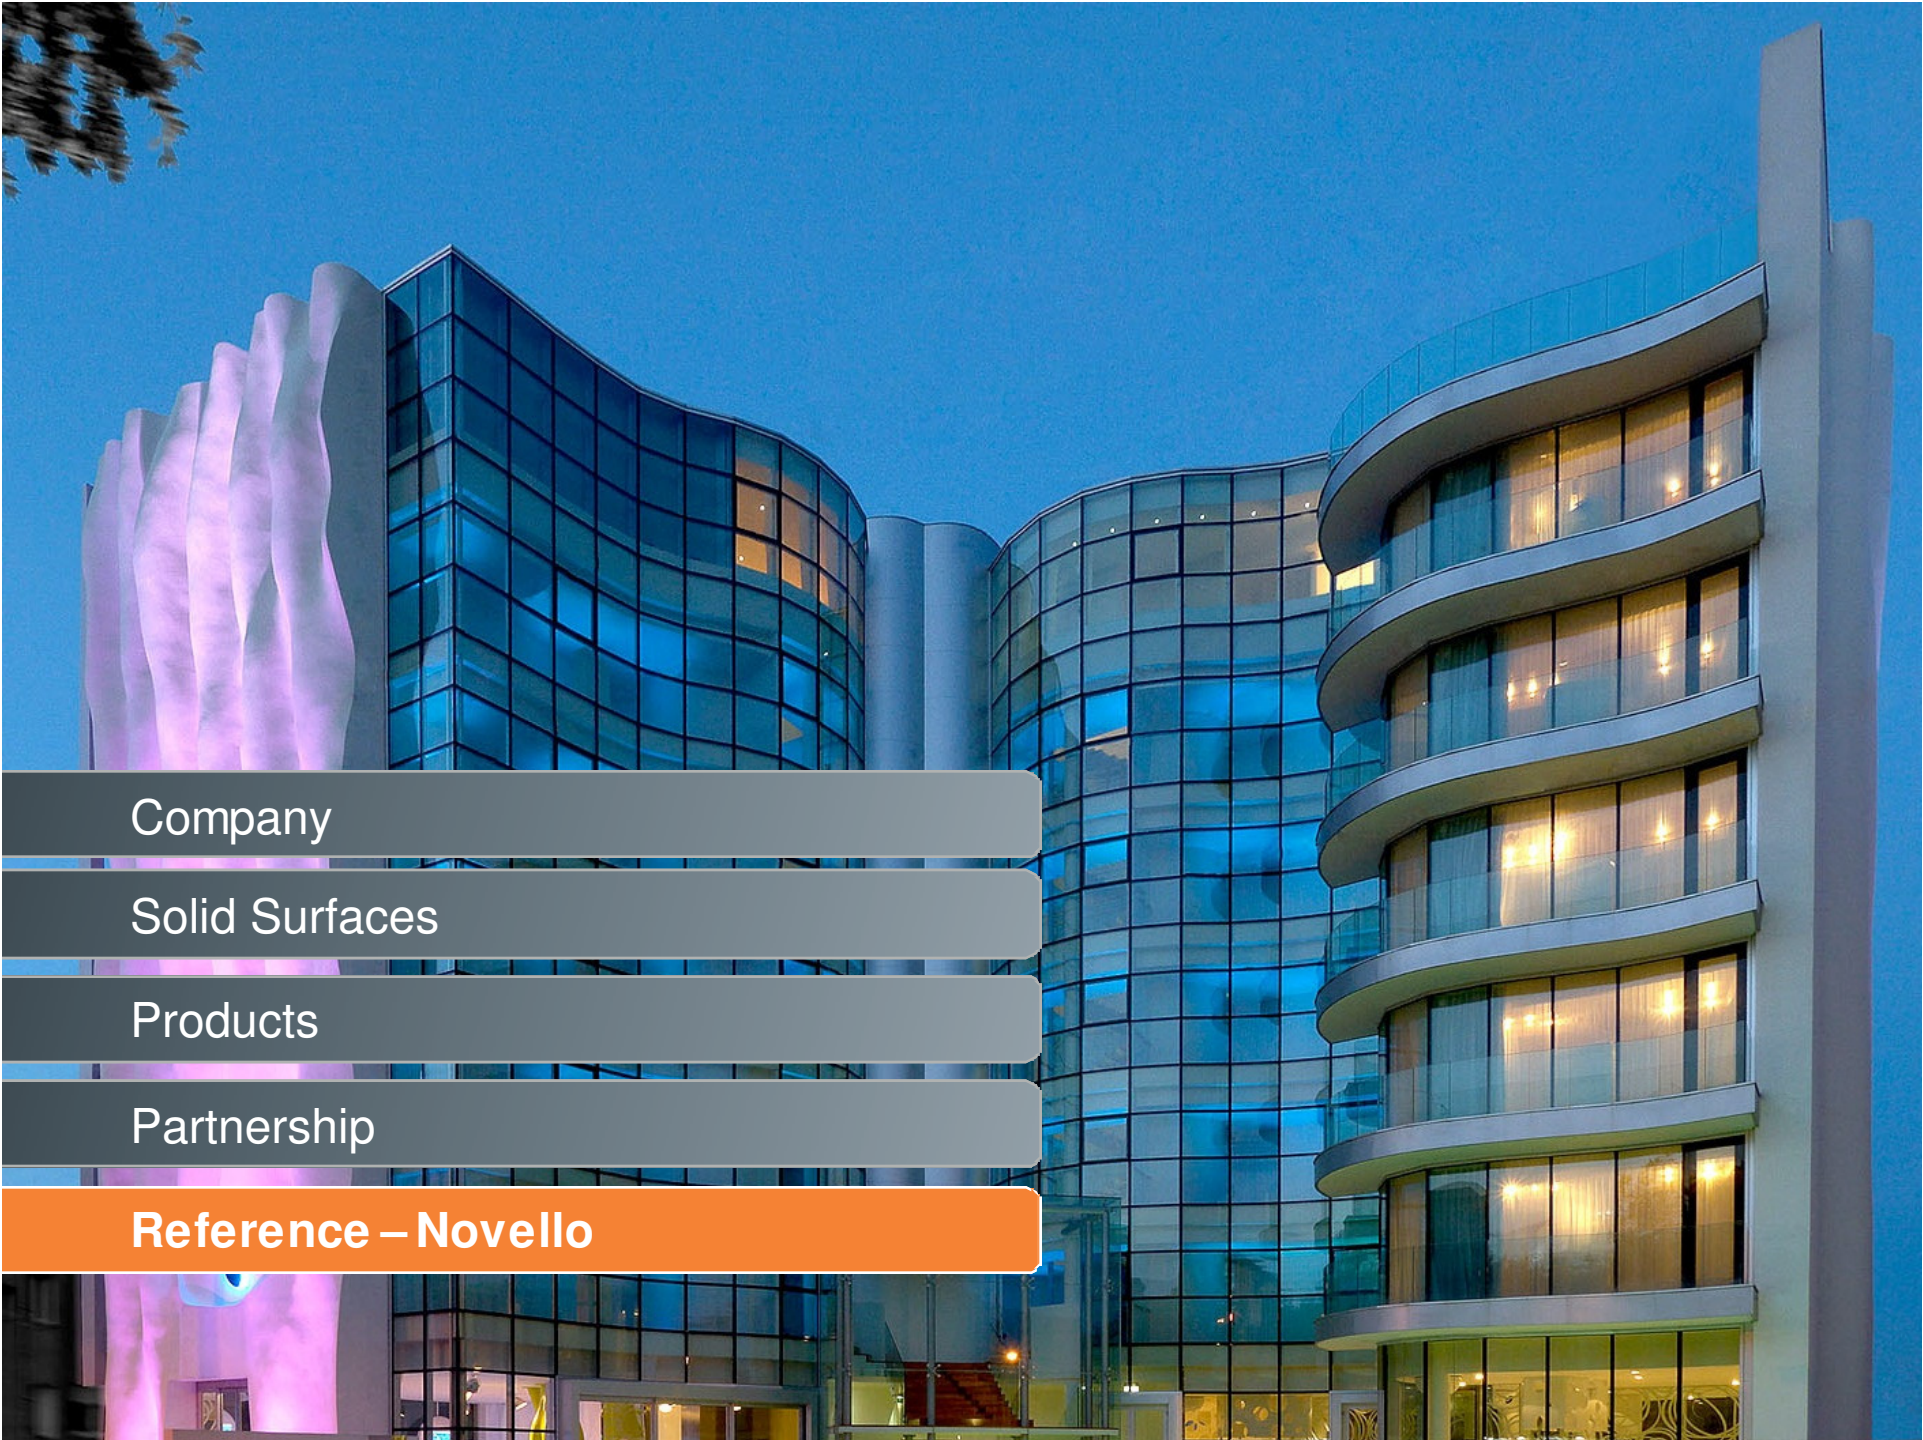

The products are delivered to the customer the same day they are produced. A perfect example of just in time production!

A proper packaging system avoids damages during the transport.

Our logistic partner is the firm Bartolini and many other local dispatchers. For urgent deliveries we may deliver with our own vehicles

All of our product are delivered with specific and clear assembling instructions.
