

FUORISALONE EVENT 2016

## **BEAUTY WILL SAVE 'THE WORLD, ART DIRECTION NESPOLI E NOVARA**

Can design objects, an artwork, good music and good food be ascribed to the concept of beauty, and so save the world?

Friul Mosaic has always been inspiring for other companies in the field due to its innovation and search of new shapes and interpretations that represent simultaneously both the classic and contemporary essences of the mosaic art.

Under the wise art direction of nespoli e novara, they become an integral part of the event "Beauty will save the world", a sensorial and visual journey through design productions of high technological, artisan, and tailor made values: stories of Beauty, where men and women are protagonists, looking for a new aesthetic comfort.

The Sail of Columbus by VANIXA, exclusive emotional brazier with lava effect, and I METALLI (the metals) series, a terrazzo produced by FRIUL MOSAIC, will be active protagonists of the event. The latter is a product made by mixing the Venetian terrazzo with "scraps" of Zucchetti taps metals. The fusion between metals and two ancient techniques such as those of the terrazzo and mosaic are the basis of the innovative and contemporary collection by FRIUL MOSAIC.
